

IAN CINTI

Java Developer · Full stack

La Plata, Argentina · ian.cinti@gmail.com · iancinti.com

linkedin.com/in/ian-cinti · github.com/iancinti · medium.com/@ian.cinti

I maintain critical foreign trade systems in Java and on the mainframe, and I build end-to-end web products with Next.js, like the Estudiantes de La Plata digital museum.

EXPERIENCE

Java Developer · Banco de la Nación Argentina

August 2024 — Present

Foreign Trade project

- We maintain critical foreign trade systems day to day: export permits, foreign currency and banknote trading, controls with the Central Bank (BCRA) and audits.
- The core runs on the mainframe, written in Natural on Adabas; the distributed Java systems (JSF) host the services that integrate with external layers.
- I am currently taking part in migrating those services from Java 8 to Java 21.

Java 8 → 21 · JSF · Mainframe · Natural · Adabas

Backend Developer · Branded

July 2023 — July 2024

- Worked on the Spring Boot backend of a mobile app for a startup.
- Agile team, delivering in sprints.

Web Developer · Garden supply store

April 2022 — March 2023

- E-commerce site for garden supplies: order and inventory logic, and backend tuning.

Before code: City of La Plata (2021 — 2022): Planning and assistance · Capital Diario (2019 — 2021): Commercial equipment advisor · Test Viajes (2016 — 2019): Tour group coordination and travel package sales

FEATURED PROJECT

Estudiantes de La Plata Digital Museum

museoestudiantes.iancinti.com

A QR code on every display case and wall of the club's museum: visitors scan it and get the story, an audio guide, photos, videos and games on their phone. I designed and built it end to end, from idea to production.

- Works offline: a service worker stores the whole museum on the phone.
- Narrated audio guides in Spanish, English and Portuguese.
- Quiz with a live leaderboard: the server times and grades answers; nicknames are moderated before they reach the screen.
- Sticker album, stamp passport and shareable story images.

Next.js · React · TypeScript · Tailwind CSS · PostgreSQL · Supabase · Vercel · Service Worker · Canvas

PROJECTS

Item comparison: Product catalog with hexagonal architecture and integration tests. (Java, Spring Boot, Docker)

Hotel G3: Hotel management REST API, built as a team at the 2024 Oracle Next Education hackathon. (Java, Spring Boot, Docker, Next.js)

TuristeAR: Management system for a travel agency, back end and front end. (Kotlin, React)

Mercado Libre challenge: Reactive technical challenge against a Mercado Libre service. (Java, Spring WebFlux, Docker)

SKILLS

Backend: Java 8 to 21, Spring Boot, Spring WebFlux, JSF, Kotlin, REST APIs, Hexagonal architecture
Mainframe: Natural, Adabas
Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS
Data and infrastructure: PostgreSQL, Supabase, Docker, Vercel, Git

EDUCATION

Web Development Technical Degree · Universidad Nacional de Chilecito (UNDEC) · online
Since June 2025 · expected to graduate in June 2027

University Programmer Analyst (partially completed) · Universidad Nacional de La Plata	2022 — 2023
Java Full Stack / Spring · Ministry of Education and Innovation	2023
Java Backend / Spring · Alura Latam	2023
Java Backend career, Frontend with JavaScript, OOP, Git and GitHub · Platzi	2021 — 2023
Community Communication · Universidad Nacional de La Plata	2018 — 2021
